

CLASSIC CHAMBERS
Exclusive Mobile Loos

Luxury refined

THE NEXT GENERATION

Contemporary fresh water loos

WC2 'Accessible' pod combines sophisticated style with the latest fresh water vacuum technology to deliver a level of refined luxury demanded by great events.

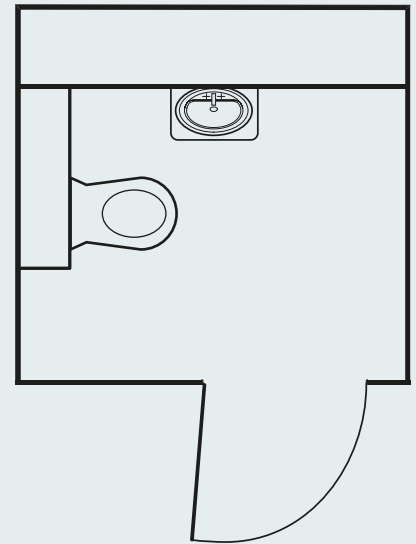

Each 'Accessible' pod is a floor mounted facility suitable for those requiring more spacious facilities including brides with bridal gowns, parents with children and wheelchair users.

THE NEXT GENERATION

Fresh Technology

- JETS™ Vacuum operated, fresh water flush (0.5l per flush)
- Odour-free and Chemical-free

Vacuum flushing technology means that with each flush the air in the WC cubicle is replaced with fresh air from outside, eliminating any odour problems that could occur with more conventional systems. A vacuum-based flush also means splash-free flushing thereby helping to maintain clean facilities throughout your event.

WC2 pod can operate as a self-contained system using the integral water tank and external waste tank or it has the flexibility to be connected to mains services if required. Connecting a WC2 to mains services increases the capacity of the system and it can significantly reduce hire costs.

Style & Features

Each pod sits directly on the ground with no need for entrance steps. The system is particularly suited for incorporating inside marquees and tipis to create enclosed cloakroom environments.

The accessible pod is fully DDA compliant and therefore is suitable for use by wheelchair users.

There is a baby-change table included and there is plenty of space in the cubicle for parents with children or brides wearing bridal gowns for example.

- Framed images of the Lake District by Martin Lawrence Photography
- Stainless steel interior trim
- Sensor taps with hot water
- Recessed LED ceiling lighting
- Corian vanity surfaces
- Large mirrors
- Entrance lighting
- Wall hung WCs
